

COMMAND AND CONTROL VEHICLES

DESIGNED AND
EQUIPPED TO EXACT
OPERATIONAL
REQUIREMENTS

TURNKEY AND ONE
STOP SHOP TO
INCLUDE
ALL MECHANICAL,
ELECTRICAL AND IT
ELEMENTS

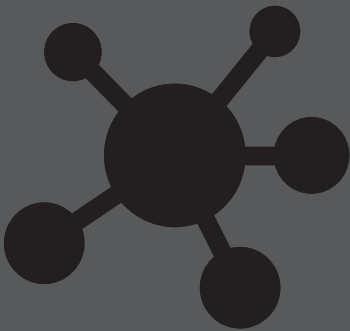

We design and equip emergency response vehicles with latest technology and facilitate their conversion process. The specialist vehicles are built to fulfill specific requirements of law enforcement organisations and emergency services. These vehicles are equipped with latest audio, video and data communication systems connected to central headquarters.

Our design meet a wide range of operational scenarios. At an incident location, a converted vehicle can be deployed as an independent operational unit or as part of a command and control fleet. The purpose built work area can accommodate an operator team of three to five people equipped with on board generator, networking rack, pneumatic masts, air conditioner and portable equipment kits.

KEY FEATURES:

1. 4x4, Van and up to 18 ton vehicle conversion.
2. Operator workstations with PC, phone, printer.
3. Audio and Video management software.
4. Pneumatic mast mounted cameras and wireless units.
5. On board generator and invertercharger for battery bank.
6. Portable equipment storage.
7. Stabilising legs.
8. Heating, ventilation and air-conditioning.
9. Reversing and door cameras.
10. Networking equipment.
